

John and Charlotte Atkinson Primary Leadership Consultancy

Inspection Data Summary Report

Tuesday 29th January 2019 (1.30 – 4pm or 5-7pm) at Whitehouse Community Primary School,
Ipswich

About your course leaders:

The course Leaders John and Charlotte Atkinson are very experienced trainers in both Analyse School Performance (ASP) and Inspection Data Summary Report (IDSR) and work extensively in providing bespoke support for primary schools across the UK. Both work as School Improvement Partners (SIPs), undertake Headteacher Performance Management and run a specific Self Evaluation Writing course in the autumn term of every school year.

Cost: Headteacher/SLT session: £50 per school (up to 2 delegates), Governor session: £20 per governor.

For further information and to book please contact:

Inspection Data Summary Report (IDSR) is a document published by Ofsted - every school has its own IDSR 2018, published in December and updated in January 2019. IDSR 2018 is the document that is currently used by inspectors to provide insight into the performance of every school. On the first page the report identifies 'areas to investigate', although it should be noted that these can be both strengths and weaknesses. Many school leaders are unsure as to how these have been determined and whether they are significant or not. It is now well known that Ofsted inspectors undertaking Section 8 inspections in 2019 have been guided to use Inspection Data Summary Report 2018 as the basis of their 'key lines of enquiry' about the school's outcomes and progress.

We have run one day courses for ASP and in response to requests from many schools we will now be offering a **half day** training course to explain IDSR, page by page, so that all leaders are absolutely confident about the messages contained within it and how the graphs and charts are actually arrived at so as you can check the accuracy of the data and whether or not it is statistically important. Governors may well find this training useful in helping them understand the headline issues on data performance in their schools.

The course will include:

- A page by page analysis of your school's Inspection Data Summary Report 2018.
- An explanation of how each chart and graph is based on information within ASP 2018.
- A check on whether or not the report accurately reflects the data in ASP.
- An analysis of whether or not the 'areas to investigate' identified on Page 1 are important for the school and to identify other potential areas of strength and weakness.
- Advice on how school leaders can respond to the key findings within their Self-evaluation.

As a result of the training:

- Heads, senior leaders and governors will be confident in discussing the data with external challengers, including inspectors.
- Heads, senior leaders and governors will have thorough responses to any challenges around their data and be able to demonstrate the actions they have taken as reflected in their school improvement plan (SIP).
