@PrimaryEastTSA

## Overview

The session will look at the 'tricky' areas of maths including division, fractions and algebra. We will look at the importance of using manipulatives to support understanding and the impact that this can have on children from early years to year 6. There will also be a focus on developing the use of 'Bar Model' to support children's understanding of multi-step problems.

## Facilitators

Gemma Watts is passionate about maths teaching and has taught children across all primary year groups. I enjoy using a very practical approach to teaching maths through using manipulatives to develop children's understanding. I am currently Head of School in a small rural school in Suffolk and teach reception, year 1 and 2.

## Date/Venue

**Thursday 24th January**

**1pm - 3.30pm**

This session will be held at Ixworth Primary School

## Cost

**£40 per delegate**

Information regarding our price promise can be found on our website.
